ARDEN LATRACA

A Senior software developer and Technical lead in my current project. I do have a strong background in Javascript specially in Knockout and Vue as well as JSP in frontend development since the project I am in right now is currently developing the frontend side of the system. However, I still do a bit of backend side such as Java Spring MVC, JSP, JSTL with JBoss as the local server.

I do have 8 years of experience in web development industry since all of my projects are web applications. I have big ambitions in life such as learn a lot of languages as long as I am still in the industry before retirement period. I want to have long term goal and relation with the company that has also has a wide vision for the future.
